We know you will have more questions. As Larry said on our call earlier this week, minor corrections/changes can be made through a letter amendment to the final document.

Darren,

We are reviewing the BO and we may have more questions....one thing I did notice and I am not sure if you can/want to change but "harm" is spelled "hram" for both butterfly and snails (page 141).

It is described on page 114. You will need to check with Lasha on where the 350 ac came from or if there is a map. Unfortunately, she is at a conference in town today and tomorrow. Im not sure if she is checking her email.

Darren,

Where does the 350 ac (142 ha) of occupied habitat for the Mariana eight spot butterfly come from? Is there a map that corresponds.

Sure. There may be more in the BO, which we just emailed to Jeff. The lit citations will definitely need to be updated in the next few weeks.

Hope you enjoy your trip to Yellowstone!

Unfortunately, I won't be in Colorado next week...I am taking annual leave and the family is headed to Yellowstone for a week in the park. I've never been and am super excited.

Coralie

P.S. I found some MINOR typos on the figures. Nothing substantive. Do you want me to send them to you?

I looking forward to not reading it any more!

If you have any questions, I will be at a training class at the Federal Complex in Lakewood next week. You can hunt me down and ask.

You would have had the final BO first thing this morning, but I left the signature box out, so Mary couldnt sign it last night. Sorry. The final should be emailed to everyone soon.

I had to make changes to the take (acreage) amounts for both the bats and the butterfly. The amounts in the ITS needed to be the same as described in the Effects section and they were not in our previous draft of the ITS. Neither changed much and it did not affect the final analysis.

Hi Coralie. Based on the way the effects section is written, I am changing the anticipated incidental take for the MFB to include 319 acres in southern Guam, for a total of 2,136 acres. This wont affect the non-jeopardy conclusion. Please let me know (quickly) if you have questions.
